PROFESSIONAL SUMMARY

Informatics student at the University of Texas at Austin with minors in Computer Science, Statistical Modeling, and Applied Mathematics. Seeking a Software Engineering role to apply hands-on experience building scalable applications, architecting robust backend solutions (Node.js, AWS, Firebase), and developing high-quality cross-platform features (React Native, Swift). Proven ability to translate complex requirements into reliable, high-performance, and well-tested software systems.

EDUCATION

University of Texas at Austin, B.S. in Informatics

2024 - 2027

GPA: 3.8/4.0

Minors: Computer Science, Applied Mathematics, and Statistical Modeling

Relevant Coursework: Data Structures and Algorithms; Databases/Data Mining; Applied Statistics; Linear Algebra; Probability I; Number Theory

Organizations: Texas Convergent, UT Machine Learning & Data Science, UT Women in Computer Science, Math Direct Reading Program

TECHNICAL SKILLS

Programming Languages: C/C++, Java, Swift, JavaScript, TypeScript, Go, Python, R, HTML/CSS

Frameworks & Tools: Docker, React.js, Node.js, React Native, Flask, Firebase, Git, GitHub, Figma, Jira, Agile Methodologies

Databases and Data Science: SQL, MongoDB, Pytorch, TensorFlow, Scikit Learn, Pandas, NumPy, Seaborn, Tableau

WORK EXPERIENCES

AdTalk | Texas Convergent

Austin, TX

Full Stack Developer | Python, FastAPI, Supabase, Google Cloud Platform, React, OpenAI API

Sep 2025 - Dec 2025

- Architected an impression verification engine to process audio data by leveraging OpenAI Embeddings and Whisper, integrating a SQL-based Supabase backend for real-time storage.
- Deployed a full-stack analytics dashboard on Google Cloud Run by implementing usage-based scaling, which optimized resource allocation and reduced infrastructure costs by 30%.
- Engineered a high-throughput validation service using FastAPI to sanitize incoming ad campaigns, ensuring data integrity for thousands of distributed events.

Park My Ride

Austin, TX

Software Engineering Intern | Swift, React Native, Node.js, Firebase, Git, AWS

May 2025 - Aug 2025

- Engineered real-time parking availability features for a consumer app by developing cross-platform components in React Native and Swift, supporting over 1,000 active users.
- Architected scalable backend solutions on AWS by optimizing data management protocols, ensuring high-performance accessibility for critical parking location services.
- Accelerated feature delivery speed by 15% through active collaboration with design and product teams using Agile and Jira to track development velocity.

Institute for Computing in Research

Austin, TX

Research Intern | Python, R, Tableau, Google Trends API, Git, Statistical Modeling, Microsoft Excel

Jul 2023 - Aug 2023

- Derived a correlation between mental health searches and COVID-19 trends by processing 50,000+ data points using custom Python and R scripts under Dr. Sara Del Valle.
- Quantified trend alignment from Google Trends API data by implementing ARIMA time series models, achieving 90% predictive alignment for public health insights.
- Communicated complex data findings to research mentors by creating interactive visualizations in Tableau, effectively translating raw data into public health narratives.

PROJECTS

Polara | React, TailwindCSS, Redux, MongoDB, Node.js, ElevenLabs API, Gemini API

Oct 2025

- Developed a comprehensive full-stack benefits platform for disabled and veteran communities by architecting a secure Node.js backend and a MongoDB database schema, ensuring data integrity, robust API design, and high-performance server-side operations.
- Integrated an AI voice assistant by leveraging Gemini and ElevenLabs APIs, enhancing accessibility for users with physical or visual challenges.

Aurora | React Native, Node.js, Firebase, Jest

Jan 2025 - May 2025

- Co-led the end-to-end development of a cross-platform alarm system by integrating real-time sleep, weather, and calendar data via external APIs into a synchronized React Native and Node.js architecture.
- Optimized the mobile UX strategy by applying user engagement analysis, resulting in a 25% increase in user retention and engagement.

VOLUNTEERING

WiSTEM @ UT Austin

Aug 2024 - Present

Program Coordinator | Google Sheets/Excel, Jira, Trello, Slack, Google Suite

- Lead hands-on STEM demonstrations for Girl Day at UT Austin by mentoring K-12 students through interactive technical workshops, resulting in increased participant interest and engagement in engineering and computer science concepts.
